

Biotype GmbH is a European in vitro diagnostics and medical device company with headquarters in Dresden, Germany. With a focus on multiplex PCR and molecular diagnostics, we develop and distribute kits and systems for clinical research and diagnostics. As a DIN EN ISO 13485 and DIN EN ISO 9001 certified company, we have integrated the complete value chain, from product innovation to development and distribution, under the highest quality standards. Founded in 1999, Biotype is currently becoming an international technology and solution provider for molecular precision diagnostics. We have established an agile organizational and communication culture with a strong team spirit. Join our team to actively shape the success of Biotype and your own professional future!

To strengthen our team, we are looking for a:

Student Trainee (m/f/d)

If you are willing to learn and eager to apply your passion for science in a commercial environment, this position is perfect for you! We are looking for a working student who is motivated and excited to learn how to use his/her scientific knowledge to help customers better understand Biotype's contract development and manufacturing services and technologies.

This role is perfect for you if:

- You love science and have a deep understanding of various scientific topics (especially molecular biology and diagnostics)
- You are enthusiastic about communicating science to diverse audiences and to learn about the possibilities of customer-focused digital marketing
- You have self-motivation and discipline to learn new skills quickly

Your Tasks

- Support our Sales team to create customer targeted communication material
- Research, write, and edit clear, accurate, and creative content for custom solutions department services
- Create content for communication material including but not limited to slide decks, web-based content, infographics, abstracts, posters, newsletters, manuscripts
- Lead and coordinate key projects and represent the company as well as the product lines at congresses, webinars etc.
- Support the social media and email marketing campaigns of Custom Solutions

Your Profile

- Student of biology, biotechnology, medicine or other relevant fields
- Highly refined written and verbal communication skills in English
- Excellent research capabilities and a strong aptitude for learning
- Ability to identify data sources, assess and validate data quality, and determine the most effective means of presenting information

- Basic understanding of social/digital communications techniques and trends
- Ability to adapt content based on the audience and the medium (social media and other communication channels)
- Knowledge of software (Photoshop, PowerPoint) to support professional graphics development and social media content is an asset
- Interpersonal skills to effectively work with other team members
- Strong presentation skills

We offer

- Work in an innovative company with an open and family-friendly corporate culture and a cooperative and enthusiastic working atmosphere
- An exciting, varied field of work with plenty of room for one's own initiative, new ideas and independent work
- We offer flexible working hours and free drinks & fresh fruit
- Start date as soon as possible
- 20 hours per week

Do you see yourself in that role and are interested in joining Biotype?
